### GENERAL SPECIFICATIONS

<b>Technology</b>	On Line Double Conversion High Frequency		
<b>Power</b>	10 kVA / 8 kW	15 kVA / 12 kW	20 kVA / 16 kW
<b>Power Factor</b>	0.8		

<b>INPUT</b>		
<b>Voltage</b>		3 x 400 VAC (Phase-Phase) + Neutral 176 VAC (Phase-Neutral) at 100 % load 110 VAC (Phase-Neutral) at 50 % load
<b>Low Voltage Range</b>	<b>Battery mode transfer</b>	186 VAC (Phase-Neutral) at 100 % load 120 VAC (Phase-Neutral) at 50 % load
	<b>Low line comeback</b>	
<b>High Voltage Range</b>	<b>Battery mode transfer</b>	300 VAC (Phase-Neutral)
	<b>High line comeback</b>	290 VAC (Phase-Neutral)
<b>Frequency Range</b>		46~54 Hz at 50 Hz / 56~64 Hz at 60 Hz
<b>Phase</b>		3-phase with neutral and ground
<b>Power Factor</b>		≥ 0.99 at 100 % load

<b>OUTPUT</b>		
<b>Voltage</b>		230 V
<b>AC Voltage Regulation (Batt. Mode)</b>		± 1 %
<b>Frequency Range (Synchronized Range)</b>		46~54 Hz at 50 Hz / 56~64 Hz at 60 Hz
<b>Frequency Range (Batt. Mode)</b>		50 Hz ± 0.1 Hz or 60 Hz ± 0.1 Hz
<b>Current Crest Ratio</b>		3: 1 max
<b>Harmonic Distortion</b>		≤ 2 % THD (Linear Load) ≤ 6 % THD (Non Linear Load)
<b>Transfer Time</b>	<b>AC Mode to Batt. Mode</b>	Zero
	<b>Inverter to Bypass</b>	Zero
<b>Waveform</b>		Pure Sinewave
<b>Backup time</b>		From 8 to 30 mn depending on the connected load
<b>Output outlets IEC 10A (or NEMA 110V) standards / programmables</b>	2/0	2/0
<b>Output terminal standard / programmable</b>	yes/yes	yes/yes

<b>EFFICIENCY</b>	
<b>AC Mode</b>	89 %
<b>Battery Mode</b>	88 %

<b>BATTERY</b>		
<b>Standard Model</b>	<b>Battery Type</b>	12 V / 9 AH
	<b>Numbers</b>	20      40
	<b>Typical Recharge Time</b>	9 hours recover to 90% capacity
<b>Long-run Model (S)</b>	<b>Charging Current (max.)</b>	1 A      2 A      2 A
	<b>Battery Type &amp; Number</b>	Depending on the capacity of external batteries
	<b>Charging Current (max.)</b>	4 A      8 A      8 A

<b>DISPLAY</b>	
<b>LCD Panel</b>	UPS status, Load level, Battery level, Input/Output voltage, Discharge timer and Fault conditions

<b>ALARM</b>		
<b>Battery Mode</b>		Sounding every 4 seconds
<b>Low Battery</b>		Sounding every second
<b>Overload</b>		Sounding twice every second
<b>Fault</b>		Continuously sounding
<b>Bypass mode</b>		Sounding every 2 minutes

<b>PHYSICAL</b>		
<b>Standard Model</b>	<b>Dimensions H x W x D (mm)</b>	576 x 250 x 592      826 x 250 x 862
	<b>Net Weight (kgs)</b>	86      139
<b>Long-run Model</b>	<b>Dimensions H x W x D (mm)</b>	576 x 250 x 592      576 x 250 x 592
	<b>Net Weight (kgs)</b>	30      37

<b>ENVIRONMENT</b>		
<b>Operation Humidity</b>		20-90 % RH at 0- 40 °C (non-condensing)
<b>Noise Level</b>		< 58 dB to 1 metre      < 60 dB to 1 metre

<b>MANAGEMENT / COMMUNICATION</b>		
<b>RS 232 &amp; USB communication ports</b>		Supports Windows family, Novell, Linux, Mac and FreeBSD
<b>Optional SNMP</b>		Power management from SNMP manager and web browser
<b>Dry contacts</b>		Dry contacts communication card for remote alarm
<b>Software</b>		InfoPower

<b>NORMS</b>		
<b>Standard</b>		CE
<b>EMC</b>		EN62040-2: 2006
<b>Low voltage (Safety)</b>		EN62040-1-1: 2003, 2006/95/EC

<b>SALES INFO</b>		
<b>Warranty</b>		2 years
<b>Package content</b>		RS232 cable, USB cable, user guide, software
<b>Standard versions gencods (230V)</b>	3700085 65760 7	3700085 65761 4      3700085 65762 1
<b>Extended backup time versions gencods (230V)</b>	3700085 65757 7	3700085 65758 4      3700085 65759 1

### Accessories

- **SNMP agent :**  
The use of SNMP agent with E4 LCD UPSs makes it easier to manage the UPS and network power supply due to a number of special features :  
- Connection to the Ethernet network and identification by IP address  
- Low battery detection.  
- Configuring and programming system extensions and restarts on a weekly or other basis ...  
- Setting the UPS locally or remotely.  
- Auto-diagnosis of the UPSs while operating.  
- Automatic shutdown according to pre-defined priorities on network PCs.  
- Sending warning messages to network users.  
- Events log.

- **AS400 dry contact card :**  
The AS400 communication card supplies dry contacts to feedback alarms from your UPS or centralized technical management. Depending on the applications, dry contacts may normally be open or closed.

- **Communication software :**  
An E4 LCD UPS can close files on its own, if there is no power, thanks to the InfoPower control software (supplied as standard), and in doing so save data from all the PCs in a network. The communication software also offers a graphic interface to view system status, different measures, events log, etc.

- **Warranty**  
Two-year warranty (UPS + battery).

All other trademarks or registered trademarks belong to their respective owners. Photos are not binding. Specifications are subject to change without prior notice. Backup time is only a guide: actual duration may vary depending on the temperature, battery condition and peripherals added. UPS are part of electronic and electric equipments category. At the end of their lives, they have to be collected separately. 07 09 39 55 111 37

## Networks & critical applications

# E4 LCD From 1 to 60 kVA\*

The entire range of E4 LCD (S) and E4 LCD (S)TM UPSs is designed to protect critical networks, data centers, server groups and industrial applications.

So as to meet the various protection needs for medium power industrial applications from 1 to 30 kVA in mono-mono and from 10 to 60 kVA in tri-mono configuration, the E4 LCD range offers several versions:

- E4 LCD from 1 to 10 kVA standard version
- E4 LCD S from 1 to 10 kVA extended backup time version
- E4 LCD TM 10, 15 and 20 kVA tri mono standard backup time version
- E4 STM 10, 15 and 20 kVA Tri Mono extended backup time version.

**The most reliable of technologies**  
The On Line Double Conversion technology delivers a perfect sinusoidal output current and provides thorough and effective protection of critical devices.

**Output power factor of 0.8**  
E4 LCD UPSs generate an upgraded power factor reaching 0.8, thereby offering higher performance and improved efficiency for vital applications.

**Practical design**  
UPS status is seen at a glance on an intuitive LCD screen. The UPS is controlled by a simple control panel on the front with 3 or 4 buttons: ON/OFF, operating mode configuration, voltage setting, programmable outlet setting...

Technology On Line Double Conversion

Redundant parallelizable\*

Single phase/Single phase or Three phase/Single phase

LCD control panel

Remote control software

Tel/fax/modem protection\*

Extended backup time version available

**UPS controlled by a microprocessor**

Among other advantages this control mode provide a wide range of input voltage (110 V to 300 V), an input power ratio of more than 95 %, little harmonic distortion and effective noise reduction.

**Programmable outlets for load and backup time management**

Programmable outlets allow users to easily control different load groups separately. They will therefore be able to increase the backup time on the most strategic and vital hardware, during a power outage, by stopping non-critical hardware connected to programmable outlets. These outlets are easily managed via the LCD screen.

**50/60 Hz frequency converter mode**

The output frequency can be set to 50 Hz or 60 Hz independently of the input frequency making it easier to adapt to specific hardware.

**Communication**

USB or RS 232 communication ports and SNMP interface enable an E4 LCD UPS to communicate with the various stations and IT servers it is protecting.

The multiple communications function should be noted: USB or RS232 ports can therefore operate simultaneously with the SNMP interface.

**Energy saving ECO mode**

Efficiency of up to 97 % equates to energy and cost savings. In addition, a static bypass power supply via the UPS offers timely return to on-line double conversion if required.

**Emergency Power Off (EPO)**

This function ensures the safety of personnel and hardware in the event of fire or any other emergency situation by triggering the total and immediate shutdown of the UPS.

**Extended backup time (S model)**

Opportunity to increase battery power for unstable or highly disrupted environments. The S versions (extended backup time) are delivered without an internal battery but with external battery packs. These battery extensions are available in several sizes depending on the desired backup time.

**Intelligent battery chargers to optimise battery performance**

A battery charger from 1 to 3 kVA with 2 levels reduces charging time and adjusts the charging voltage according to the outside temperature thereby generating energy savings and extending battery life. UPSs from 5 kVA are fitted with extendable chargers with 3 levels optimising battery performance as well as their recharge time and extending their useful life even further. In addition, due to an extendable design, several chargers can be connected in parallel as needed, thereby offering a greater battery charge capacity.

**Cold start function**

It enables an emergency situation involving a total power cut to be overcome by starting the UPS using batteries without the mains power supply.

**Overload protection**

Protection of internal power components from any foreseeable deterioration and prevention of connection errors.

**Auto-test at start-up**

Automatic control of loads, power supply and UPS internal operation for greater reliability.

**E4 LCD 1-1,5 kVA**

**E4 LCD 2-3 kVA**

**Modular design**

Facilitates the maintenance of each module comprising the UPS: ventilation, charger, power supply, converter, etc.

**Static by-pass**

In the event of overload or an internal fault, load transfer from normal mode to static by-pass mode prevents a sudden power cut to the protected load.

**E4 LCD UPSs from 5KVA provide the following distinct advantages:**

- DSP technology that offers space and weight saving by replacing cumbersome transformers, relays and other mechanical switches while also ensuring an improvement in the overall performance and efficiency of the product (volume-power ratio).
- A manual maintenance bypass.
- An in/out connection terminal (two outlets: one normal outlet and one programmable outlet for non-critical loads)
- In addition to the terminal, two outlets mean that hardware can be connected directly to the rear of the UPS.
- The opportunity to connect up to 3 UPSs in redundant parallel mode (N+X) enables the capacity and reliability of the protection solution to be increased.
- Battery-free startup : the UPS (connected to the mains) will start up without a battery or with one or several defective batteries.

**E4 LCD 5-6-10 kVA**

**E4 LCD (S)TM UPSs**, available in 10, 15 & 20 kVA models (up to 60 kVA in parallel), are supplied with a three-phase input voltage (three phase/single phase UPSs).

- E4 LCD TM UPSs have their own built-in batteries for standard backup time.
- The E4 LCD STM models are delivered without an internal battery but with external battery packs. These battery extensions are available in several sizes depending on the desired backup time.

**E4 LCD TM 15-20 kVA**

- 1/ AC input outlet
- 2/ Standard output outlets
- 3/ Programmables output outlets
- 4/ RJ11/45 protected outlets
- 5/ USB communication port
- 6/ RS232 communication port
- 7/ EPO (Emergency Power Off)
- 8/ Input breaker
- 9/ SNMP agent slot
- 10/ Output terminal
- 11/ Input/Output terminal
- 12/ Parallel port
- 13/ Battery connector (\*S\* models only)

**E4 LCD (S) 1-1,5 kVA**      **E4 LCD (S) 2 kVA**      **E4 LCD (S) 3 kVA**      **E4 LCD (S) 5-6-10 kVA**
